---

To whom it may concern:

As a Nurse Practitioner, I work very hard to obtain the trust of my teenage population in the School Based Clinics I work in. This is critical in our setting. It only takes one insurance slip with confidential information being given to a parent to destroy the provider/patient trust. Since teens talk it potentially affects the whole school and community. We strive in School based care to provide comprehensive care. I ask you to do whatever you can to ensure confidentiality for our teens.

Thank you,

Beth Beaudet FNP-BC
